

Construction Closures and Detours, January – May 2019

Beginning early February thru early summer, there will be construction activities in the main entry area of the Reno-Stead Airport.

To facilitate this activity, we are closing gates and re-routing traffic for airport access.

The main entry gate at Bravo and Mt. Vida St. will be closed. Enter the airport at Bravo and Mt. Charleston, 1 block to the west. To access the ramp and Airport Terminal, cars will follow the detour route shown. Terminal parking will be INSIDE the fence near the control tower.

There will be NO THRU traffic on Alpha because the gate on Alpha at Mt. Charleston will be closed. The gate at Mt. Limbo St. next to the National Guard facility will also be closed.

Trucks delivering to the Airport or its tenants may enter at either the Mt. Vida St. detour thru the inner gate near the tower, or via the western gate at Alpha and Mt. Anderson.

Do not enter airport property unless you have business at the airport.
